Dear Parents

Re Maths for Mums & Dads

We are sometimes told by parents that the way schools teach maths today is very different to the way they were taught the subject. Maths for Mums and Dads, written by Rob Eastaway and Mike Askew, Professor of Mathematics Education at King's College, London, may help parents to understand modern teaching methods for maths.

*"This book is for mums, dads and grandparents who want to help their children or grandchildren with maths. To do so, many parents find they need to overcome their own rustiness and also to learn the strange new methods and terminology. (Do 'chunking', 'the grid method', 'Carroll Diagrams' and 'partitioning' mean anything to you?). Throughout the book are games, puzzles and examples of amusing ways in which kids ingeniously 'get it wrong'."*

Parents can order the book through the school for £4.00(r.r.p £9.99) please complete the order form below and return it to school with a cheque for £4.00 made out to The Book People. There is no delivery charge). Orders must be received by .....

Yours Sincerely

Head Teacher
